

FUNNY MONEY

Solve each equation and check each solution. Place the letter of the problem in the space above the answer. Some letters are used more than once.

$$E) 15 - (x - 6) = 6 - (3x + 5)$$

$$A) (8x - 11) - (15 - x) = 1$$

$$W) 2(x - 5) - 5x = 8 - 3(5x - 2)$$

$$Q) 3(2x - 3) - 12 = 4(x - 5)$$

$$U) 5 - 7(2 - x) = 31 - 4(2x - 5)$$

$$R) 3(x + 5) = 21 - 4(x + 5)$$

$$O) 3x + 2(x + 2) = 13 - (2x + 2)$$

$$T) 2(x + 4) + 16 = 0$$
